ELSEVIER

Journal of Statistical Planning and Inference 50 (1996) 413–414

journal of statistical planning and inference

Author Index Volume 50 (1996)*

Aggoun, L., *see* R.J. Elliott (3) 343–351
Babu, G.J. and E.D. Feigelson, Spatial point processes in astronomy (3) 311–326
Bera, A.K. and X.-L. Zuo, Specification test for a linear regression model with ARCH process (2) 283–308
Carter, R.A.L., Some small-sample properties of instrumental-variables estimators of block triangular models (2) 207–221
Chaturvedi, A., Robust Bayesian analysis of the linear regression model (2) 175–186
Cressie, N. and S.N. Lahiri, Asymptotics for REML estimation of spatial covariance parameters (3) 327–341
Donatos, G.S. and G.C. Michailidis, A Monte Carlo study of some limited and full information simultaneous equation estimators with normal and nonnormal autocorrelated disturbances (2) 273–282
Elliott, R.J. and L. Aggoun, Estimation for hidden Markov random fields (3) 343–351
Feigelson, E.D., *see* G.J. Babu (3) 311–326
Floresroux, E.M. and M.L. Stein, A new method of edge correction for estimating the nearest neighbor distribution (3) 353–371
Giles, D.E.A., *see* J.A. Giles (1) 21– 35
Giles, J.A. and D.E.A. Giles, Risk of a homoscedasticity pre-test estimator of the regression scale under LINEX loss (1) 21– 35
Gouriéroux, C., A. Monfort and E. Renault, Two-stage generalized moment method with applications to regressions with heteroscedasticity of unknown form (1) 37– 63
Heyde, C.C., On the use of quasi-likelihood for estimation in hidden-Markov random fields (3) 373–378
Kent, J.T. and K.V. Mardia, Spectral and circulant approximations to the likelihood for stationary Gaussian random fields (3) 379–394
King, M.L., Hypothesis testing in the presence of nuisance parameters (1) 103–120
Knight, J.L. and S.E. Satchell, The exact distribution of the maximum likelihood estimators for the linear regression negative exponential model (1) 91–102
Lahiri, S.N., *see* N. Cressie (3) 327–341
Lee, D.K.C. and P.M. Robinson, Semiparametric exploration of long memory in stock prices (2) 155–174
Lütkepohl, H., Testing for nonzero impulse responses in vector autoregressive processes (1) 1– 20
Mardia, K.V., *see* J.T. Kent (3) 379–394
Martin, R.J., Some results on unilateral ARMA lattice processes (3) 395–411
Mehta, J.S., *see* P.A.V.B. Swamy (1) 121–153
Michailidis, G.C., *see* G.S. Donatos (2) 273–282
Monfort, A., *see* C. Gouriéroux (1) 37– 63
Morimune, K. and K. Oya, Limited information estimation and testing subject to linear constraints (2) 223–240
Osiewalski, J. and M.F.J. Steel, A Bayesian analysis of exogeneity in models pooling time-series and cross-sectional data (2) 187–206
Oya, K., *see* K. Morimune (2) 223–240
Renault, E., *see* C. Gouriéroux (1) 37– 63
